Occupied Perspectives: New Undergraduate Research

In linguistic and literary terms, an "unoccupied perspective" refers to a point of view in a narration that is not filtered through a particular subject—as one scholar explores in his presentation. We've reversed the term in the conference title as a whole to highlight our collective accomplishments: twenty "occupied perspectives" on the world in which we live and the knowledge we are part of creating. Please enjoy our diverse viewpoints at the Third Annual Haas Scholars Program Spring Research Conference.
