THE 2012–2013 HAAS SCHOLARS warmly welcome you to their 14th Annual Undergraduate Research Conference. As the conference theme suggests, these scholars have approached their work with undaunted enthusiasm. Some have survived dengue fever, bicycled through harsh terrain, navigated swamp-land, or faced a national revolution to bring their research findings to you. Others have challenged conventional wisdom in their disciplines, finding new ways to interpret and understand the familiar. All have done careful, methodologically sophisticated work. Over the next two days, rekindle your curiosity about the world as the Haas Scholars present the results of their audacious inquiry.
