

WELCOME to the 2018 Haas Scholars Undergraduate Research Conference! Our theme, drawn from one scholar's project on alternative band *Primus*, reflects the multiple ways in which the scholars have pushed forward against "the wind of conformity." In their personal lives, they have defied many obstacles to achieve excellence at UC Berkeley. In their work, they have questioned social institutions and hierarchies, suggested new interpretations of art and literature, proposed novel explanations for scientific phenomena, and offered new solutions for technical dilemmas. By challenging conventional wisdom in their respective fields, they have contributed essential new insights.
